Wednesday, November 5, 2025

9:45 a.m. – 10:15 a.m.

Alpha-1 Antitrypsin Deficiency: A Canadian Success Story

Speaker: Kenneth Chapman

This insightful presentation tailored for healthcare professionals will deepen your understanding of severe alpha-1 antitrypsin deficiency and its critical association with COPD phenotypes. This session will emphasize the importance of recognizing varying COPD phenotypes and identifying patients at risk of alpha-1 antitrypsin deficiency within your practice.

By attending, you will:

- 1. Review the importance of recognizing COPD phenotypes.*
- 2. Examine the clinical impact of severe alpha-1 antitrypsin deficiency.*
- 3. Understand how intravenous augmentation therapy, now available to all Canadians, can extend the lives of patients with alpha-1 antitrypsin deficiency.*
- 4. Learn how to identify these at-risk COPD patients in your own practices.*

12:45 p.m. – 1:15 p.m.

ACT NOW! NO MORE "KID-NEYING" AROUND

Speaker: Dr. Ian Kasloff and Dr. Claudio Rigatto

Join us for an engaging discussion and strengthen your clinical competencies and take decisive steps toward improving kidney and cardiovascular outcomes in diabetes care.

3:00 p.m. – 3:30 p.m.

Supercharge your Uninsured Services Program

Speaker: Dr. John O'Mahony

What if the entire uninsured service encounter were just as easy as scribing? AI Scribes capture and document. Agent systems go further – they facilitate the encounter. With agentification, documentation doesn't stop at the note. It automatically triggers every uninsured step – carrying itself through to completion while you move on to the next patient. This is AI scribe and beyond.

Thursday, November 6, 2025

9:45 a.m. – 10:15 a.m.

Practice Pearls for Perimenopause

Speaker: Dr. Denise Black

1. Understand the distinct stages of menopause, including perimenopause and menopause, and identify the wide range of symptoms associated with these transitions.
2. Explore the role of KNDy neurons in regulating these symptoms, enhancing the understanding of their physiological impact on women during this period.
3. Describe evidence-based best practices for managing medical issues during peri- and post-menopause, including the management of contraception needs, addressing irregular bleeding, and effectively treating vasomotor symptoms (VMS).

12:45 p.m. – 1:15 p.m.

The Revolution Continues: A Small Sensor to Generate Big Conversations

Speaker: Dr. Ian Kasloff

This session will explore the clinical application of the FreeStyle Libre 3 Plus system in improving diabetes care. Participants will examine the benefits of sensor-based technology in supporting patient empowerment and positive behavior change. Opportunities to integrate these tools into management plans, including individuals not using insulin, will also be discussed.

3:00 p.m. – 3:30 p.m.

Infant RSV Protection in Primary Care

1. Overview of disease burden and the risks of RSV in infants
2. NACI recommendations for RSV protection
3. Overview of infant RSV protection options
4. Review of Beyfortus® clinical data and real-world evidence
5. Implementation of Beyfortus® in primary care

Friday, November 7, 2025

9:45 a.m. – 10:15 a.m.

Stronger Bones, Smarter Care: A Brief Review of the 2023 Canadian Osteoporosis Guidelines

Speaker: Dr. Upender Mehan

Objectives:

- *Identify and summarize the most significant updates, including diagnostic criteria, risk assessment tools, and treatment recommendations.*
- *Discuss how the new guidelines affect patient care, including screening protocols, medication choices, and follow-up strategies.*
- *Emphasize the importance of proactive bone health management, especially in high-risk populations such as older adults and postmenopausal women.*

12:45 p.m. – 1:15 p.m.

Autoimmune Type 1 Diabetes

Speaker: Sonja Reichert

Type 1 diabetes (T1D) is an autoimmune disease with a well-defined progression, yet it often goes undetected until clinical symptoms appear. This session will explore the autoimmune pathophysiology of T1D, outlining key stages of disease development from initial autoimmunity to clinical diagnosis. We will examine strategies for identifying individuals at risk and discuss emerging therapeutic options aimed at delaying the onset and progression of autoimmune T1D. Join us for an in-depth exploration of the evolving landscape of early detection and intervention, shaping the future of T1D management
